

Robust and smart -Realize Smart Farming with us

Due to the world's growing population, the global demand for food is constantly increasing. Land usage for agriculture and qualified personnel have become limited.

For arable farming and livestock breeding, existing resources must be used as efficiently as possible.

Digitalization has brought automation to the agricultural sector. Most of all, recurring daily tasks are being automated.

For example, so-called Agribots are used in a variety of ways to feed livestock, maintain, and pick crops and even for automated barn cleaning. Furthermore, Dunkermotoren also has the perfect drive solutions for your sowing, fertilizing or milking applications. Commissioning our robust drive packages up to IP69 K with integrated electronics is easy with our Plug & Play design.

Automation solutions taking Smart Farming to new heights.

## Why we offer the perfect drive solution

Protection class up to IP69 K

Versions for extreme temperature ranges

Vibration and shock tested to railroad standard EN 61373

Innovative, energyefficient DC concepts (IE 5)

Long service life and high cycle rates

Intelligent drive solutions

Better together

- >> From brushed gearmotors to fully integrated brushless smart wheel drives
- Our modular system offers around 25 million configuration options
- Smart Farming Our nexofox team implements smart features together with you
