

**Power  
 Generation  
 and Supply**

Energy-rich  
 and  
 sustainable  
 into the  
 future

**From the first coffee in the morning, to the drive to work, to the well-earned shower in the evening – our activities require electricity or other energy sources almost continuously.**

With durable and shock-tested motors for solar cleaning robots, mobile charging stations for electric cars or switchgear in power distribution centers, we provide the

right energy kick in our everyday lives.

**Why we offer the perfect drive solution**

Intelligent, connected and robust drive systems

High functional reliability

High degree of protection

**IP69K**

Versions for extreme temperature ranges

Vibration and shock tested as standard

Customized adaptations

” Better together

- » Our drive solutions have proven themselves over many years and therefore offer the optimum cost-performance ratio
- » Products from Dunkermotoren do not shy away from tough use – whether in the desert or the arctic – our systems hold their own
- » Integrate our drives easily into existing systems – we offer standard integrated electronics with various bus interfaces
- » For maximum customer benefit, a wide range of customer-specific adaptations can be made

” Our drives in use

Dunkermotoren  
Power Generation

Outdoor cleaning robots

Charging robots

Control of water regulation systems

Rotor blade maintenance

Switchgear
