

Building Automation

Door Automation with the World Market Leader

Nowadays, going shopping means that you're being accompanied at every turn while entering and exiting buildings.

Department stores, drug stores, and even your local bakery welcome the next customer by opening the doors automatically.

More doors are moved by a Dunkermotor solution than any other in the world.

Over the past decades, our GR 63 brushed DC motor in combination with our SG worm gearbox has

established itself as the go-to product in this market.

Thanks to our many compact and efficient drive solutions, we are your perfect partner for all things building automation.

Why we offer the perfect drive solution

Smooth running, low-noise design

High service life and cycle numbers

Protection class up to IP69 K

EMC and ESD solutions according to DIN EN 50121-3-2

Maintenance-free solutions

SMI drives

” Better together

- » Trust in the decades of experience of the world market leader
