

**Mass Transit
and Motive**

We Drive
what
Moves
People
Forward

Whether you travel on the roads, rails, or in the air, we want move people from point A to B as quickly and comfortably as possible.

Reliability and safety are a top priority here.

Dunkermotoren manufactures a variety of products for bus ramps, train doors, shipping docks, entry gates at train stations, and even

braking systems – we drive what moves people forward.

Our motor solutions ensure maintenance-free and safe operation, even with high duty cycles and temperature fluctuations.

Why we offer the perfect drive solution

Long service life and high cycle rates

Protection class up to IP69 K

Versions for example temperature ranges

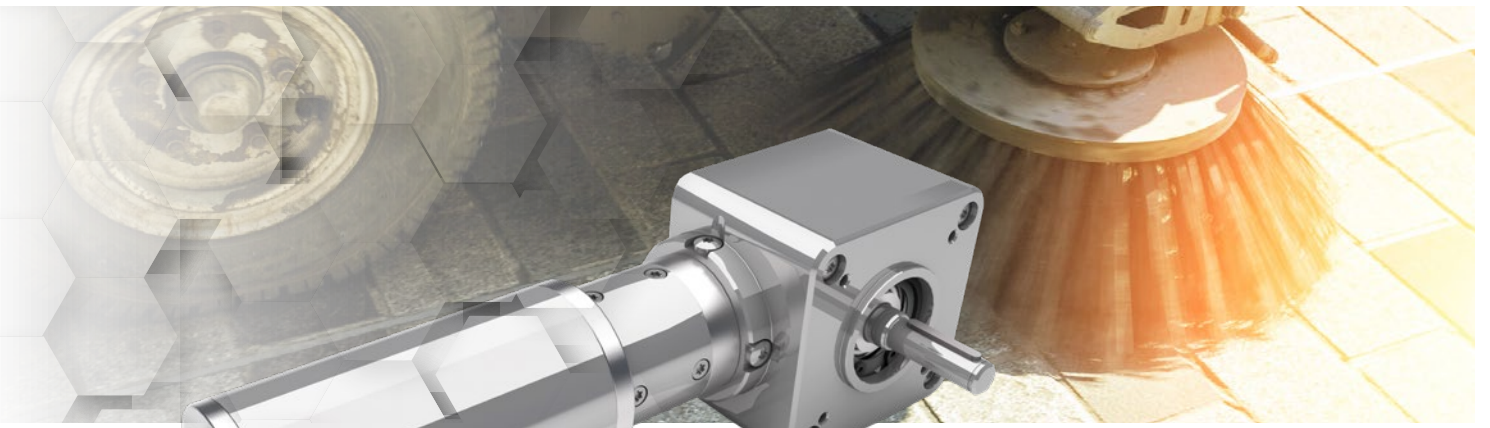

Vibration and shock tested to railroad standard EN 61373

EMC and ESD solutions to DIN EN 50121-3-2

Fire protection to EN 45545-2-2013

” Better together

- » Drive solutions from 1 to 5,000 W output power
- » Our modular system offers around 25 million configuration options
- » Not only do our motors meet the highest standards of the railroad industry EN 50155, so do our attachments, such as the ME 52 RR magnetic encoder.
- » Our drive solutions have proven themselves in the railway industry over many years – the equipment on the ICE high speed train is just one well-known example.

” Our drives in use
