

**Lifestyle and
Cleaning**

Cleanliness
& Hygiene
at Home
and in Public
Areas

We place high expectations on household and cleaning appliances.

Whether for private use or in the professional business sector, anyone who buys a modern cleaning appliance expects fast, thorough, and user-friendly support for the tasks at hand.

From the brush or traction drive in professional scrubbers to the blower inside household vacuum cleaners, our products offer maximum suction power and reliability.

We also ensure maximum satisfaction for your cup of coffee or fruit smoothie with powerful and compact drives in coffee bean grinders or blenders.

Why we offer the perfect drive solution

Customized solutions developed and made in Europe

Powerful blowers in a compact package

Best-in-class energy efficiency system in line with the new Ecodesign Directive

Robust design and long service life

Long product availability

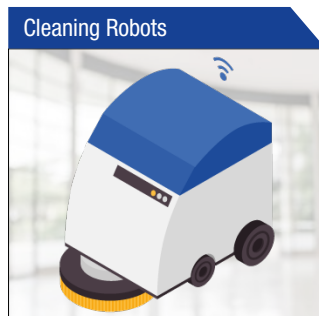

” Better together

- » Drive solutions from 1 to 5,000 W output power
- » Our smart drives in combination with a hub gearbox are perfectly suited as traction drives for autonomous, mobile cleaning machines
- » MAE's Thru-Flow and By-Pass blowers – as DC and AC versions, brushed and brushless, have been used for many years by renowned manufacturers
- » User-friendly – of course! Our products for household and cleaning appliances are compact and particularly quiet
